

Restriction of Practice Rights – Gerald Alan Ortner, P.Eng., Quesnel, BC

A complaint was made to the Association relating to deficient domestic wastewater treatment and disposal systems design and supervision services provided by Mr Ortner under the *Sewerage System Regulation*.

With the consent of the Association's Investigation and Discipline Committees, the Registrar has accepted a Letter of Undertaking from Mr. Ortner that, in lieu of the Association proceeding with an investigation of the complaint, Mr Ortner will cease practising in the areas of wastewater treatment and disposal systems effective April 16, 2010 and will complete or transfer any on-going projects to another member(s) qualified to practice in these areas and approved in writing by the Registrar of the Association. If at some point in the future Mr Ortner wishes to remove his practice restriction, he may do so on proof of further training in wastewater treatment and disposal systems acceptable to the Registrar.
