

The Association of
PROFESSIONAL ENGINEERS AND GEOSCIENTISTS
of the Province of British Columbia

LIMITED LICENCE

Larry Bergquist has signed an undertaking and is therefore authorized to engage in the practice of Professional Engineering in the Province of British Columbia, within the limited scope as specified hereunder:

Reporting on, designing, directing construction and supervision of maintenance of the mechanical components of retail petroleum facilities, service stations and modifications to bulk fuel plants.

The bulk fuel plants noted will typically contain six to eight storage tanks which are shop fabricated to ULC Standards and will have a total maximum storage capacity of 150,000 Imperial Gallons. The scope does not include work described above on new plant construction, but only modifications to those facilities. The bulk plants will typically have truck or train car unloading facilities and truck loading facilities.

Excluded from the scope are all refining process equipment, bulk storage and associated refinery distribution facilities and all bulk distribution facilities and association bulk storage units with the exception of modifications to the smaller bulk plants noted.
