

The Association of  
**PROFESSIONAL ENGINEERS AND GEOSCIENTISTS**  
of the Province of British Columbia

## LIMITED LICENCE

**David Shauer** has signed an undertaking and is therefore authorized to engage in the practice of Professional Engineering in the Province of British Columbia, within the limited scope as specified hereunder:

**Limited Licence in Electrical Engineering for low energy Electrical Systems (<750 volts) and only as directly related to Instrumentation and Control System Design Requirements.**

### **Limitations and Exclusions:**

- 1. Design practice in power distribution area is limited to single phase systems, including uninterruptible power systems (UPS) and their designs intended for the exclusive usage in the area of Instrumentation and Control Systems, up to and including 10 kVA rating per system.**
- 2. Design practice excludes any and all aspects of three-phase electrical power distribution systems design such as motor control centers, power distribution switchgear and similar power distribution equipment, protective relaying, coordination**

(See Over)

**studies, power systems grounding protection and similar specialized electrical design tasks.**

**3. Design practice excludes all areas of three phase electrical engineering related to sizing of feeder cables, motors, protection of power equipment such as feeder and branch circuit breakers.**
