

Are you interested in developing your career in New Zealand?

Alexander & Co is an established and market leading building surveying and architectural practice based in Auckland, New Zealand. We specialise in building envelope performance assessment, envelope design and remediation. A growing market means we are seeking experienced professionals to join our expanding team.

Positions Available:

Building Envelope Engineer, and Building Science Technologist.

Role:

- Depending on position applied for and applicant skills, responsibilities may include:
- Building envelope failure investigation and diagnosis
- Envelope design and/or review
- Restoration/remediation design, specification and management
- Envelope performance monitoring and modelling (e.g. hygrothermal and energy)
- In-situ envelope testing to recognised standards
- Sustainable / green building review and advice
- Advice on building materials, assembly and technology
- Building repair and maintenance advice
- Condition assessments / due diligence
- Quality management advice or review
- Research of building products, processes or regulations
- Litigation support / expert evidence

Qualifications and Experience:

You will hold a relevant engineering degree/diploma, and ideally have experience in building envelope assessment, design and remediation. A team player and effective communicator, you will be self-motivated and creative, and have an ability to adapt to changing environments. An interest in leadership and personal development is desirable.

Contact:

If these are areas in which you have expertise, and you are excited by the challenge of developing your career in New Zealand in a dynamic and challenging field, we would like to hear from you. For further information, or to submit your resume, please contact us on careers@alexander.co.nz.
