POSITION AND RESPONSIBILITIES

You will provide mechanical engineering oversight on major projects executed within Cameco and by outside consulting companies providing engineering services to Cameco.

The oversight role consists of ensuring engineering work is done in accordance with Cameco's processes, procedures, standards and regulatory requirements. You will also be responsible for developing and integrating mechanical design standards for use on all major projects. You will liaise with operations staff to ensure project operability, provide project and technical expertise from an oversight perspective and assist with leading initiatives within the project delivery model.

EDUCATION AND QUALIFICATIONS

Requirements of the position:

- Bachelor's degree in mechanical engineering
- Seven to 12 years of progressive experience in process and/or mining operations
- Equivalent combination of education and work experience considered
- Eligible for registration with the Association of Professional Engineers and Geoscientists of Saskatchewan (APEGS)
- Experience in piping, equipment design and layout, building services, HVAC and materials handling
- Ability to effectively communicate and build strong relationships

Assets:

- Experience in the mining industry
- Supervisory/oversight experience in an owners representative role
- Direct preparation of standards and procedures relating to mega projects
- Ability to effectively coordinate with a multi-disciplined engineering team

Safety is a top priority at Cameco. Successful candidates for all safety sensitive positions must pass a substance test as a condition of employment.
