

## **Electrical Engineering Supervisor North Vancouver, BC**

### **I Choose Opportunity.**

Whatever job you're looking for, you can probably find it at Cargill. Our diverse partnerships across a variety of industries mean countless career opportunities for you. It's your choice. It's your future. And you can make it happen at Cargill.

Cargill AgHorizons is the division of the company dedicated to creating value for agricultural producers, specifically grain and oilseed growers in the Prairies and Ontario. This division leads the industry in providing innovations in the areas of grain origination, agronomic and grain marketing consulting, and crop input supplies. Professionally trained customer focus teams work one-on-one with their producer customers, building long-term relationships-striving to understand their farming business and providing distinctive solutions, matched to their unique needs.

Reporting to Terminal Engineering and Maintenance Manager, the Electrical Engineering Supervisor will supervise the maintenance crew and contractors in support of the objectives supporting the other fundamental spheres of the Operational Excellence Strategy promoting reliable, safe and sustainable terminal operations. This will include Transformer and Distribution System Maintenance, CSD Testing, and Process Control devices such as plug chutes and Variable Frequency Drives.

### **Principal Accountabilities:**

- Develops, incorporates and reviews procedures, executes 'Hazard Assessments', training and education programs; lead specific training efforts for maintenance staff and operational personnel
- Coaches, counsels, and mentors the charge-hand and individual technologists and trades personnel
- Responsible for group vacation scheduling and overtime
- Monitors PM performance, conducts equipment reviews, develops programs for long-term improvements, initiates corrective actions on reoccurring maintenance or other problems, and coordinates major maintenance projects
- Ensures effective spare parts and equipment inventory/outsourcing arrangements are in place and maintained consistent with asset criticality
- Evaluates suppliers annually to measure effectiveness and where applicable; recommends yearly supply or service contracts

### **Qualifications**

#### **Required:**

- Bachelor of Applied Science in Mechanical or Electrical Engineering; Recognized standing as a professional Electrical engineer
- 3-5 years of experience supervising or managing in a unionized environment
- Experienced in structural, mechanical, electrical and electronics
- Ability to institute preventive and predictive maintenance planning and procedures, including the ability to upgrade, change or modify programs, equipment and/or processes.
- Experienced in computer utilization and computerized maintenance management systems

**Preferred:**

- Experience with bulk handling equipment
- Experience in Hazardous Atmosphere requirements
- Experience managing in a unionized environment
