

Position: Maintenance Superintendent  
Region: Canada

Company: Inland Aggregates  
Location: Edmonton, Alberta Canada

**Summary:**

Reporting to the Operations Manager, this position supervises the overall maintenance program. The main focus of this position is to continuously improve plant reliability and productivity. This position is responsible for the Villeneuve operation as well as a portable crush plant in the Edmonton area.

With pits, quarries and plants located throughout the Prairie provinces, Inland Aggregates has a dedicated team of employees who pride themselves on providing high-quality products and service to their customers. The company offers an extensive product line, currently producing in excess of 9 million tonnes annually across the region.

Located twenty minutes west of Edmonton, Villeneuve is the largest operating aggregates pit in the Prairie provinces and the third largest in Canada.

Inland Aggregates is a division of Lehigh Hanson Materials Limited, one of the world's leading heavy building materials companies with over 14,000 employees in North America. Lehigh Hanson Canada Region employs 2,000 people.

Lehigh Hanson is owned by HeidelbergCement and represented internationally in more than 40 countries on five continents, with over 55,000 employees. HeidelbergCement is the global leader in aggregates and has leading positions in cement, concrete and heavy building products.

**Responsibilities:**

- Supervise the maintenance department employees
- Schedule the repair, maintenance and installation of equipment, tools, machinery and mobile equipment and coordinate plans with production department
- Oversee the installation of new mechanical processes and systems to improve plant operations
- Oversee purchasing of parts, tools and maintenance supplies.
- Develop and manage maintenance budget and manage cost control initiatives
- Achieve maintenance goals and objectives consistent with overall operating targets
- Review and evaluate maintenance programs, planning and scheduling, equipment availability, supplier performance, and project work
- Ensure compliance requirements are met through organizational and procedural measures including implementation of Group guidelines, completion of required training, and monitoring compliance.
- Proactively manage safety and health of employees to continuously improve the company's safety and health performance.

**Skills and Qualifications**

- Degree in mechanical engineering or related field
- 5 – 10 years experience in aggregates mining or a related industrial environment
- Supervisory experience required preferably in a unionized environment
- Demonstrated expertise in the areas of preventative and predictive maintenance programs, project management, and the inspection, repair and installation of equipment
- Strong computer skills including Microsoft Office, Auto CAD, and industry design aids
- Strong leadership, communication, planning, and analytical problem solving skills
- Min 5 years in aggregate mining/production or heavy industry; previous management/supervisory experience
- Knowledge of safety and mining codes and regulations
- Financial management skills including budgeting, forecasting, and cost management
