

Process/Application Engineer

Business Unit: Aker Kvaerner Process Systems,
A Division of Aker Kvaerner Oilfield Services Canada Inc.
Competence: Oil & Gas Process
Location: Calgary, Canada, Americas
Experience: 10-15 years
Apply by: February 29, 2008

Aker Kvaerner is an industry leader in supplying selected process technology, process equipment, engineering and construction services for the upstream oil and gas industry. Focusing on trust, we continually and consistently perform according to the highest standards of ethical behavior, integrity and honesty. By joining our team, you will be a part of a company where values are taken seriously, and where you will be able to contribute immediately to a dynamic and results oriented culture.

Aker Kvaerner Process Systems has an opportunity for a Process/Application Engineer to work with our Oil & Gas Process team.

Responsibilities include:

- Lead engineer for one large project or on several smaller projects/proposals/studies
- Establish scope of work for each project or proposal.
- Process design for assigned projects by establishing design criteria and implementing the preparation of specifications, design computations, drawings, models, and bills of material in accordance with basic project requirements.
- Technical management for assigned projects, review and monitoring of designs.
- Develop the process schedule and drafting of manpower needs for assigned projects, schedule work of department and develop the organization procedures, methods and controls to be used.
- Organize activities with other departments and clients.
- Provide specialist guidance in the design and delivery of complex engineering projects within their discipline.

The successful candidate will have the following qualifications:

- 10-15 years oil plant facility/equipment specialist experience in process design group
- University graduate in applied sciences or engineering (Chemical or Mechanical)
- Proven leadership in process management
- Strong business and negotiation skills
- Knowledge of project management and engineering tools & systems

Aker Kvaerner Process Systems offers a competitive compensation package, including a comprehensive benefit plan, flexible work hours, a great learning environment and the opportunity for career advancement.
