

Junior Engineer

Keystone Environmental, a rapidly expanding and dynamic Environmental Engineering / Consulting firm located in Burnaby, British Columbia, is currently seeking a Junior Engineer who is eager to take their career to the next level.

Position:

- Conduct field work associated with construction / remediation oversight, water (surface, groundwater and wastewater) sampling, soil and air sampling, and system troubleshooting.
- Assist with engineering tasks such as calculations, contacting vendors, preparing specifications, field work, data tabulation, reporting and other support tasks.

Qualifications:

- A minimum of 2 years experience in an Engineering Consulting firm
- Registered as an EIT with APEGBC.
- Holds a degree in Engineering.
- Client oriented; good multi tasking skills and excellent communication skills.
- Ability to perform complex assignments within approved budget and timeline.
- Ability to effectively interact with other technicians, engineers / geoscientists, supervisors and administrative personnel
- Knowledge of AutoCAD and Land Survey would be considered an asset.

Keystone Environmental offers a competitive salary and an attractive employee benefits package which includes 3 weeks vacation to start.

All qualified applicants are encouraged to achieve their own potential within our dynamic and successful organization. Please email your resume and cover letter quoting the job title in the subject line to: rbertani@keystoneenvironmental.ca
