

Making a difference...together

Manager, Engineering – Salt Spring Island

\$88,700 - \$104,354 per annum (2011 rates)

A beautiful rural community, Salt Spring Island (SSI) is the largest of the Gulf Islands. With a population of about 10,000, SSI is comprised of a number of distinct neighborhoods within village centres and scattered throughout the island's forested and pastoral landscapes, and along its stunning coastline.

Working from this idyllic location, the Capital Regional District is looking for an experienced senior Engineer to provide leadership, direction and professional expertise specific to SSI services, projects and initiatives, which include water, wastewater, and transportation initiatives. This position is responsible for local services utility and transportation initiatives on SSI through internal contract arrangements with other CRD service functions, external contracts, and outside agencies. As well, this position is responsible for project management, engineering, planning, design and construction functions to ensure the timely and cost effective completion of projects, and for ensuring that projects are managed and coordinated to achieve effective project outcomes, consistent communication and information to stakeholders, and compliance with applicable bylaws, legislation and CRD policies and procedures.
