*To explore this career opportunity, please visit www.cameco.com/careers. Deadline for applications is **February 29, 2012**. Please quote competition number **C11-237**.*

POSITION AND RESPONSIBILITIES

You will provide structural engineering oversight for a broad range of projects in Cameco's major projects portfolio. These projects will be executed both within Cameco and by outside consulting companies providing engineering services to Cameco.

The oversight role consists of ensuring engineering work is done in accordance with Cameco's processes, procedures, standards and regulatory requirements. You will be responsible for developing and integrating structural design standards for use in all major projects. You will develop and supervise a team of engineers and technologists responsible primarily for major project oversight under your direction.

EDUCATION AND QUALIFICATIONS

Requirements of the position:

- Bachelor's degree in civil/structural engineering
- Seven to 12 years of relevant work experience
- Equivalent combination of education and work experience considered
- You must be eligible for registration with APEGS

Assets:

- Experience in foundations, concrete and structural engineering design, national building code and national fire code
- Oversight experience in a projects environment
