*Regularly ranked as one of the best companies to work for*

At Golder Associates, we strive to be the most respected global group specializing in ground engineering and environmental services. Employee-owned since our formation in 1960, we have created a unique culture with pride in ownership, resulting in long-term organizational stability. Our professionals take the time to build an understanding of our clients' needs and of the specific environments in which they operate. Golder has experienced steady growth in the number of people we employ and our technical capabilities. We now employ over 7,000 people who operate from more than 160 offices across Africa, Asia, Australia, Europe, North America and South America.

### **The Position**

The Burnaby Office is seeking an experienced Geotechnical Engineer to join our team. The successful candidate will be involved in a variety of civil/geotechnical engineering projects with a focus on foundation engineering, site characterization, natural hazards assessment and geotechnical engineering for land development, municipal infrastructure, mining, and transportation projects.

Your responsibilities will include:

- Preparation of technical proposals and reports;
- Mentor and/or direct technical staff on projects;
- Design and manage geotechnical investigation programs of various scales;
- Assist in the development of client relationships;
- Undertake a wide variety of geotechnical investigations and design that may include technical piling, ground improvement programs, foundation design and stability assessments.

- Ensuring quality control/quality assurance of field work, field data analysis and interpretation, and engineering calculations;
- Ensuring client satisfaction, including maintaining existing good client relationships and developing new ones;
- Preparing proposals and design work packages in response to client requests;
- Managing projects according to client-approved scopes of work and delivering high quality reports on time and within budget;

This position will initially involve working under the supervision of senior team members, with the opportunity to rapidly assume increasing autonomy and responsibility.

**Qualifications and Skills:**

The successful candidate will have the following qualifications and skills:

- Graduate degree in geotechnical, geological or civil engineering;
- Currently registered or eligible for registration with APEGBC;
- Five or more years relevant working experience since graduation;
- Strong written and oral communication (English) skills;
- Experience in problem solving with industry standard commercial computer software programs;
- Experience with, or aptitude for, business development and proposal writing;
- Proven record of independent work and ability to work effectively within a team environment;
- Excellent technical writing and verbal communication skills;
- Field experience is an asset and some travel will be required.

**Application:**

Interested applicants are encouraged to apply on-line at [www.golder.com](http://www.golder.com) in the Career/Canada section. No phone calls please, only those candidates whose background closely matches the opportunity will be contacted for an interview. Competition will close when a suitable candidate is found. Thank you for your interest in Golder Associates Ltd.
