

LEAD THE TEAM AS  
**SENIOR PROCESS ENGINEER**

You have a minimum 5 years experience as a process engineer and are now looking for something more challenging. As a chemical engineer with a P.Eng, you're ready to lead the design team of a leading, well established engineering and equipment supply company to the process industries, where you can apply your knowledge of environmental, heat recovery, evaporation, chemical handling, and separation systems.

Flowsheet development, heat and material balances, equipment sizing, technical specifications, cost estimating, report and proposal writing are all second nature to you. You enjoy the challenge of technical presentations, Hazops, audits, troubleshooting, and startups.

A.H. Lundberg Systems Limited is a well established engineering and equipment supply company with beginnings dating back to 1954. Today we supply engineering, environmental systems, energy systems (heat recovery), evaporators, and equipment to industry. Together with our sister company in Bellevue, Washington, we have installations world wide. See [www.ahlundberg.com](http://www.ahlundberg.com)

If this is you, please send your resume to [bder@ahlundberg.com](mailto:bder@ahlundberg.com).
