#### POSITION AND RESPONSIBILITIES

This senior engineer, electrical position resides within the engineering team within the major projects department and reports directly to the chief engineer, electrical.

As the senior engineer, electrical, you will provide electrical engineering oversight for a broad range of projects in Cameco's major project portfolio. These projects will be executed both within Cameco and by outside consulting companies providing engineering services to Cameco.

The oversight role consists of ensuring engineering work is done in accordance with Cameco's processes, procedures, standards and regulatory requirements. You will be responsible for developing and integrating electrical design standards for use on all major projects. You will develop and supervise a team of engineers and technologists responsible primarily for major project oversight under your direction.

#### EDUCATION AND QUALIFICATIONS

##### Requirements of the position:

- Bachelor's degree in electrical engineering
- Seven to 12 years of relevant work experience
- Equivalent combination of education and work experience considered
- Experience in medium and low voltage industrial electrical systems
- Strong communication skills
- You must be eligible for registration with APEGS

##### Assets:

- Experience in high voltage
- Experience in the use of electricity in mineral processing facilities and underground mines
- Oversight experience in a projects environment

*Safety is a top priority at Cameco. Successful candidates for all safety sensitive positions must pass a substance test as a condition of employment.*
