

Title: Senior Engineer - Electrical

Location: Vancouver

Link to Apply: <http://jobs.applyfirst.ca/jobs/31104>

- **Take on this pivotal role within a high performance team - lead a diverse range of projects!**
- **Attractive remuneration package to reflect the seniority of this role!**
- **Job security, targeted professional development and career advancement on offer!**

About the Organization

D.C. Maritime Technologies Inc., (DCMT) is a small independent and highly specialized electrical engineering company that provides consultation to the global marine and offshore industries.

About the Opportunity

DCMT are embarking on an exciting period of growth and are seeking a talented **Senior Electrical Engineer** to join their Vancouver team

Reporting directly to the Vice President - Operations, the primary responsibility of this senior position will be the **design of marine and offshore electrical generation, distribution, propulsion and control systems.**

This position requires an **experienced Electrical Engineer**, with a **relevant Bachelor degree** and **Professional Engineer Designation**. While a background in the marine industry is preferred, if you don't already have this you will be expected to rapidly acquire relevant marine electrical knowledge and become familiar with the set standards and regulations.

About the Benefits

Playing a **crucial role within a close-knit team**, the successful applicant will **receive an attractive remuneration**, which will reflect the experience and skills you bring to the role. You will love the **fast-paced and energetic working environment**, and will appreciate the **clearly defined career path**, which will see you as a **Senior Engineer Project Manager within 3-5 years.**

This is a fantastic opportunity to build your career in a pivotal leadership role with a respected firm, dedicated to excellence!
