

Gibraltar Mine: A Rock-Solid Foundation for Career Growth

At Taseko Mines, we're proud to call British Columbia our home. We are looking for enthusiastic employees who share our vision for long-term, responsible growth in this province.

Taseko is in the midst of building the GDP3 project which includes the construction of a new 30,000 ton per day concentrator to complement the existing 55,000 ton per day facility at the Gibraltar Mine.

Located in the heart of BC's stunning Cariboo region, Gibraltar is approximately 60 km north of Williams Lake. It is the second largest open pit copper mine in Canada.

The GDP3 project has created an opening at the Gibraltar Mine for the following position:

PROJECT ELECTRICAL ENGINEER

Position Summary:

Reporting to the Project Manager, the Project Electrical Engineer is responsible for providing discipline engineering services to support the project engineering and procurement (EP) process. The Project Electrical Engineer communicates and coordinates project specific engineering activities with peers, consultants, construction management personnel and mine site operations management to ensure that project designs meet safety, environmental and operations requirements as well as corporate goals and objectives. This is accomplished by working as a key member of the project engineering team.

Specific Duties and Responsibilities include but are not limited to:

- Review consultant designs for compliance with all relevant codes, standards, regulations and permits
- Review project specifications, designs and proposed changes to ensure that project objectives and targets are met. Make recommendations to improve the operations, maintenance and construction of the project facilities
- Provide technical studies, preliminary designs, cost estimates as required to evaluate projects or project alternatives
- Monitor engineering, procurement and/or construction progress
- Monitor, control and forecast project costs and schedules
- Provide technical support for construction activities and participate in the contract award and contract management processes
- Review QA/QC plans and reports to ensure that facilities are constructed as designed
- Participate in facility commissioning and turn-over to operations
- Demonstrating an awareness of costs and performing activities in a cost effective manner

Qualifications

- Electrical Engineer or registered as an EIT working towards professional engineering status in the electrical field
- Minimum of 3 years project experience in the electrical field
- Experience in large industrial EPCM projects and/or experience at an operating mine in the electrical field would be considered an asset
- Ability to work with a diverse group of technical employees in achieving common objectives
- Strong written, verbal and group presentation skills

Compensation

Gibraltar offers an excellent benefit package which includes competitive salary, a Registered Retirement Savings Plan, and relocation assistance to Williams Lake.

Qualified applicants, eligible to work in Canada, are invited to explore this opportunity by submitting a cover letter and detailed resume outlining your qualifications and experience, in confidence, by email to: recruit@gibaltarmine.com.
