

INTERMEDIATE / SENIOR GEOTECHNICAL ENGINEER POSITIONS

Parkland Geotechnical Consulting Ltd. (ParklandGEO) is a partnership of independently owned and operated engineering consulting firms with 6 centres in Alberta. We provide a range of services in geotechnical engineering, environmental assessments, remediation, as well as consulting services. Our company provides specialized services such as slope stability assessment, foundation engineering, and liner design.

Continuing demand for the kinds of services that we provide has resulted in immediate opening for intermediate and senior geotechnical engineers, who will take a technical leadership role for the geotechnical groups in our Calgary, Fort McMurray, and Red Deer offices.

Working as part of a group in one of our offices, you will be responsible to:

- Provide technical review of geotechnical office and lab operations;
- Coordinate and project manage a wide variety of geotechnical projects;
- Undertake detailed geotechnical analysis and design tasks;
- Mentor geotechnical staff in all offices;
- Prepare and review of proposals;
- Prepare and review reports.

Qualifications

Consideration will be given to applicants with:

- Minimum 6 - 8 years of experience;
- Registration with APEGGA as a P.Eng.;
- A Masters or PhD in geotechnical engineering is considered an asset;
- A strong background in foundation engineering, earth structures and slope assessment;
- Knowledge of current professional practices and technological advancements in engineering;
- Strong written and oral communications;
- Ability to identify opportunities for company growth;
- Ability to manage clients and staff with strong people skills;

At ParklandGEO, people come first. We make significant investments in our people, which is why we take great care to hire only those who we believe will thrive in the consulting services industry over the long term. We've developed a unique corporate culture that sets us apart from the rest and provides:

- Challenging and interesting work
- Collaborative, team based approach
- Ongoing career growth and development
- A positive, flexible and supportive work atmosphere
