

Overview:

International Thermal Research (ITR) of Richmond, BC designs, manufactures and markets non-powered diesel heaters to the United States and Canadian military and to the mining and exploration camp, tent and outdoor structure markets. ITR also designs, manufactures and markets the HURRICANE and OASIS powered heaters to commercial customers.

We are looking for an experienced mechanical engineer to work in the area of diesel heater and burner design on a contract basis. This may lead to a full time position.

Qualifications:

5 – 10 years of experience in burner and heater design, preferably diesel
Experience with sheet metal fabrication, machining, injection molding and die casting would be an asset.

Knowledge of materials and material selection

Fluent in English language (written and verbal)

Knowledge of safety standards such as UL, CSA, and CE

Ability to work under pressure in a dynamic environment

Education:

Mechanical engineering degree
