Advance your career – join AMEC

AMEC is a focused supplier of high-value consultancy, engineering and project management services to the world's oil and gas, mining and metals, clean energy, environment and infrastructure markets. With annual revenues of over C\$4.7 billion, AMEC designs, delivers and maintains strategic and complex assets and employs some 27,000 people in around 40 countries worldwide. Find a company with a progressive culture that makes it stand out from the crowd – one that delivers excellence to its customers by believing in its people, never compromising on safety and always acting with integrity.

AMEC's Mining & Metals business performs consulting and EPCM services for many of the world's leading mining companies and is executing world-class projects on five continents.

We currently have an exciting opportunity for an Intermediate Material Handling Engineer. Reporting to the Material Handling Department Manager, this position is located in our Vancouver, BC office. This role has overall responsibility for participating in conceptual design and planning and implementing of material handling systems. If you have a successful track record and thrive on challenges in a fast paced environment, this is the opportunity for you.

Responsibilities:

- Participating in conceptual design and planning of materials handling systems.
- Participating in the development of detail and performance specifications as well as contract documents.
- Performing detailed material handling calculations.
- Reviewing project documents prior to issue for scope and presentation, including verifying technical accuracy.
- Developing and maintaining positive, sustainable client relationships.
- Coordinating and working with project team members.
- Providing technical leadership to technical staff.
- Overseeing the development of materials handling standards, specifications and work practices.

Qualifications:

- Degree in Mechanical Engineering.
- A minimum of 5 years of experience in the design of material handling projects in the mining industry coupled with proven industrial experience.
- Ability to register as a Professional Engineer in British Columbia.
- Ability to work efficiently and effectively when managing multiple tasks.
- Excellent interpersonal and communication and skills.
- Ability to work independently and in a multi-disciplinary team environment.

AMEC is an equal opportunity employer, a global leader in sustainability and recognized as one of Canada's Top 100 Employers for 2011. Since 2000, Engineering News Record magazine has ranked AMEC among the top International Design Firms. AMEC has also ranked at the top of its sector in the Dow Jones Sustainability Index since 2005.
